iodd-2531 is shipped with NTFS firmware.  
You can download exFAT/FAT32 firmware from <http://iodd.kr>

If you are new to iodd-2541, please follow the next steps.  
You can mount ISO files easily.

1. Open the **Disk-Management (Start->Run->diskmgmt.msc)** in Windows. And do right click on the left panel of IODD disk.
2. Click Properties->Volume, you can check the partition types. **IODD supports only MBR.**
3. Also IODD uses only the first partition for root folder. **The first partition must be Healthy and Primary partition.**

4. Open the root folder of first partition in IODD disk
5. Make new folder named **\_ISO** at root folder

6. Copy into **\_iso** folder all supported file with subfolders.  
And Do safely remove and reconnect iodd-2541.

**IODD  
Supported  
file**

**\*.iso**

**\*.VHD**

**\*.RMD**

**\*.IMA**
